Professional Summary

Full Stack .NET Developer with expertise in **ASP.NET Core, MVC, and RESTful APIs**, skilled in building scalable and maintainable applications. Experienced in applying **Clean Architecture, DDD, and CQRS** to improve system structure and performance. Strong background in **SQL Server/MySQL** with focus on query optimization, reliability, and Agile development.

Experience

Software Developer, Softech Foundation – Kathmandu

Jan 2024 – Present

- Designed and developed scalable applications using C#, ASP.NET Core, MVC, and Web API, ensuring maintainability and high performance.
- Applied DDD, CQRS, and Clean Architecture to structure modular and testable systems.
- Developed RESTful APIs and MVC applications for secure backend services and responsive web interfaces.
- Designed and optimized SQL Server/MySQL databases, improving query efficiency and data integrity.
- Implemented unit and integration tests, reducing defects and increasing system reliability.
- Collaborated with stakeholders to translate business requirements into scalable technical solutions.
- Utilized GitHub and Jira to manage version control, track progress, and support Agile workflows.

Education

- **Bachelor in Computer Application (BCA)** – Patan NIST College
- **Diploma in Information Technology** – Nepal Banepa Polytechnic Institute

Technical Skills

- **Languages:** C#, JavaScript, SQL
- **Frameworks:** ASP.NET Core, MVC, Web API
- **Frontend:** HTML, CSS, JavaScript, jQuery, Bootstrap
- **Databases:** SQL Server, MySQL
- **Tools:** Git, GitHub, Postman
- **Concepts:** DDD, CQRS, Clean Architecture, RESTful APIs

Projects

➤ Project Management System

- Developed an advanced platform for technical interview preparation, featuring real-time coding challenges and mock interview simulations.
- Implemented user authentication and session management for secure access
- Architected scalable solutions using ASP.NET Core MVC.

➤ Meeting Management System

- Developed a system for municipalities to streamline meeting scheduling, document management, and secure workflows, enhancing efficiency, transparency, and compliance with robust security and multilingual support
- Developed a system for municipalities to manage meetings and documents efficiently using ASP.NET Core, SQL Server, HTML, CSS, Bootstrap, JavaScript, and jQuery. Enhanced workflow automation, security, and transparency.
- Demonstrated expertise in front-end and back-end development with seamless integration across layers.

➤ Planning Management System

- Developed a system for municipalities to streamline urban and rural planning processes, including project tracking, resource allocation, and compliance monitoring. Enhanced efficiency, transparency, and collaboration with secure workflows, real-time updates, and reporting features.
- Developed a secure user login system with role-based authorization, enabling personalized access to user-specific forms and reports. Implemented robust authentication mechanisms to ensure data security and restricted access based on user roles.
- Designed a robust database schema with MS SQL for effective data handling.

➤ SDIMS (System Delivery and Information Management System)

- Worked on the development of an API module, responsible for designing, implementing, and integrating APIs to support various functionalities. Ensured efficient data communication between systems, maintaining security, scalability, and performance standards.
- Designed the database for the API module, ensuring efficient data storage and retrieval. Successfully completed all modules, ensuring seamless integration and optimal performance across the system.
